

Petition of 1,000,000

To the Congress and President:

Our Declaration of Independence declares that; "Life, liberty and the pursuit of happiness are inalienable rights for all people. Heretofore, life was a fixed period of time, which has steadily risen over the years. Recently, medical science has made amazing discoveries about how humans age and why they die. Many diseases are being conquered and our lives are being prolonged.

The possibility of immortality is on the horizon. No longer is an indefinite lifespan an impossible dream. But many hurdles still remain.

It is our position that immortality be considered a national priority. In order to give full meaning to the right to "life" we need a "war on aging"

We ask you to create the conditions that will make this possible.

First, a National Institute for Immortality be created with sufficient revenues to fund research in this area.

Second, grants and tax breaks for universities and private sector initiatives working on projects conducive to achieving indefinite life extension.

Third, a National Commission be organized to study the social and economic impacts of this new reality.

Fourth, a "Manhattan Project" to cure the terminal disease of aging.

Petition of 1,000,000

Please take a moment to fill out and send back the petition below, using your choice of fax, mail, or Email as soon as possible.

As C.E.L.'s first foray into the political area we are collecting 1,000,000 signatures in order to inform our elected officials in Washington that people care about this issue.

Ultimately, politics is about people! We need to generate a grass roots movement for indefinite life extension and this is a good way to begin.

Together, we can make immortality a reality.

Sign the petition and make a statement that you are involved. Download as many as you can and circulate them.

Remember, your life depends on it!

Thank You

Thomas Mooney
